

Open letter of Russian mathematicians against the war in Ukraine

FREE FLOW OF INFORMATION

An article from [TrV-science \(Trojan variant – Science\)](#) (translation by CPNN) (article later removed by [Russian government censorship](#))

28.02.2022: The editors of the Trojan Variant have received an open letter from mathematicians working in Russia. The letter is open for signing ([signatures are collected here](#)). We publish the text of the appeal to the head of the Russian Federation.

To the President of the Russian Federation V. V. Putin

Mr. President!

We, mathematicians working in the Russian Federation, strongly protest against the military invasion of the territory of Ukraine launched by the Russian army on February 24, 2022.

The standard of living in a country and its position in the world are largely determined by the level of its science. Scientists all over the world are working on problems that are not restricted to national and territorial interests, but concern the well-being of all mankind. International cooperation, lack of borders for the dissemination of knowledge and humanistic values are the foundation on which sci-

ence is built. Our many years of efforts to strengthen the reputation of Russia as a leading mathematical center have been completely depreciated as a result of the unprovoked military aggression initiated by our country.

Mathematics has always been one of the few areas of fundamental science in which Russia has maintained a leading world position. As confirmation of this, Russia was supposed to host the most prestigious mathematical conference in the world, the International Congress of Mathematicians, in the summer of 2022. The International Mathematical Union canceled this decision in connection with the Russian attack on Ukraine. In a situation where our country has become a military aggressor and, as a result, a rogue state, Russia's leading positions in world mathematics will be irretrievably lost.

In the instructions of the President of December 4, 2020, mathematics was named a priority area for the development of the Russian Federation; goals were set both in the field of fundamental science and in education. These goals, of course, cannot be achieved in the current conditions, when the lives of our closest colleagues – scientists in Ukraine, with whom we have been connected by many years of successful joint work, are daily in danger, the source of which is the Russian army. Russia finds itself in international isolation, without the possibility of intensive scientific exchange and cooperation with scientists from other countries.

We are convinced that no geopolitical interests can justify the sacrifices and bloodshed of war. It will only lead to the loss of the future of the country for which we work.

We demand an immediate cessation of hostilities and the withdrawal of Russian troops from the territory of Ukraine.

Signatures as of 13:50 March 1, 2022. The order of signatures is random. The collection of signatures continues. If you are a mathematician working in Russia, [you can leave your signature here](#).

161. Eduard Lerner, Ph.D., Associate Professor, KFU
162. Vladimir Polyakov, Ph.D., Tula
163. Dmitry Golikov, Bachelor of Mathematics
164. Natalia Trofimova, Graduate of the Moscow State University, Entrepreneur
165. Anna Uryson, Doctor of Physical and Mathematical Sciences
166. Alexander Abramovich Davydov, Ph.D., IPTP Russian Academy of Sciences n. collaborator
167. Alexander Andreevich Podolsky, graduate of the Faculty of Mechanics and Mathematics of Moscow State University
168. Mikhail Gabdullin, Ph.D., MIAN im. Steklov, Moscow State University
169. Andrey Ryabichev, Ph.D.
170. Alexey Minabutdinov, PhD, ETH
171. Evgeny Varfolomeev, Ph.D.
172. Mikhail Minin, PhD student, St. Petersburg branch of the Mathematical Institute, Russian Academy of Sciences
173. Alexander Alexandrovich Agafontsev, M. Sc.,

Sciences

148.Alexey Sosinsky, Ph.D., Professor, Vice-Rector,
Independent Moscow University

(Continued in right column)

Lecturer, St. Petersburg State University of
Economics

349.Natalia Strelkova, Ph.D.

350.Ilya Binder, Ph.D., Professor, University of
Toronto

351.Ivan Utkin, Ph.D., Faculty of Mechanics and
Mathematics, Moscow State University

352.Yaroslav Bazaikin, Doctor of Physics and
Mathematics
